OBJECTIVE

Greetings! I am Wai Lwin Aung, a skilled Full Stack Web Developer with a Bachelor of Computer Science degree. I have worked on various projects, including web and mobile applications, and have experience in using technologies such as CakePHP, Laravel, NodeJs, JavaScript, React, React Native, and more. I am currently working as an Backend Developer at Young Investment Group Co., Ltd. Feel free to reach out to me at wailwinaung228@gmail.com or check out my portfolio at https://wailwinaung-dev.github.io/.

EDUCATION

2013 - 2017	**Computer University (Monywa)** Bachelor of Computer Science(B.C.Sc)

WORK EXPERIENCE

March 2023 - Now	**Young Investment Group Co., Ltd** Backend Developer I am currently working as an Software Engineer, where my responsibilities include developing and maintaining E-Wallet system.
July 2022 - January 2023	**Brycen Myanmar Co., Ltd** Senior Engineer As a Senior Engineer at Brycen Myanmar Co., Ltd, my responsibilities included bug fixing and implementing new features for an ERP system developed using CakePHP, Bootstrap, jQuery, and MySQL Server. I also provided technical guidance to junior developers and collaborated with cross-functional teams to ensure the timely delivery of projects.
May 2020 - July 2022	**Sabahna Corporate Digital Solutions** Full Stack Developer As I mention before about this company, after almost finish my very first project ZDS Myanmar Web application, my collage left the company. I am the only one employee. My boss was Project Manager, Tech Lead and Mentor for me. I did everything for project from project framework download to project deploy to server.
December 2019 - May 2020	**Sabahna Corporate Digital Solutions** Junior Web Developer

During my employment at Sabahna Corporate Digital Solutions as a Junior Web Developer, there are only 3 people, my boss, my collage and me. So my key responsibilities included developing and maintaining web applications and ensuring the timely delivery of projects. I also worked on bug fixing and implementing new features for existing projects. One of my notable achievements during my tenure at Sabahna was developing a delivery system web application for ZDS Myanmar using CakePHP, Bootstrap, jQuery, and MySQL Server. The application was responsive and user-friendly, and it helped the client streamline their delivery operations.
